Art Unit: 2853

El cti n/R strictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to an ink jet printhead, classified in class 347, subclass 48.
- II. Claims 23-25, drawn to a method of producing an ink jet printhead, classified in class 216, subclass 27.

The inventions are distinct, each from the other because of the following reasons:

Inventions of groups 1 and 2 are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as laser ablation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
